Halo™ Radar

Dear Simrad Customer

As part of our ongoing commitment to quality we have been operating an extended-life testing program on Halo radar in extreme conditions.

During this testing we have discovered that one of the seals between the antenna and pedestal may degrade over a long period of time, with potential water ingress, which could lead to internal damage.

This only affects units produced before August 2016, these can be identified by serial number. Any serial number beginning with 1607 or lower is affected.

To address this issue we will be offering a replacement program for all customers. **Please contact your Simrad authorized dealer for further information.**

The warranty period of the radar will be reset to two years from re-installation.

We apologise for any inconvenience caused thank you for your support,
